

Sean McLaughlan

(636) 821-8737 sean.s.mclaughlan@gmail.com [Portfolio](#) [LinkedIn](#) [Github](#)

Skills Full stack developer, JavaScript ES6, Node, Python, React, Redux, Flask, SQLAlchemy, HTML5, CSS3, Git, PostgreSQL databases

Projects

Sketchcircle (JavaScript, Python, React, Redux, Flask, SQLAlchemy, HTML, CSS)

[Live Site](#) | [Github](#)

A community sketchbook site with goal setting and other features

- Designed goal graph to automatically create ideal data points to guide and assist users in accomplishing their goals
- Utilized regex to gather image links and display them in an image only timeline feature which allows users to conveniently view important content

PlanetSide Stats (JavaScript, ReactJS, Node.js, HTML, CSS)

[Live Site](#) | [Github](#)

A React application that visualizes stats and information from the game PlanetSide2

- Implemented asynchronous JS to acquire and sort data from third party API without page refreshes for an uninterrupted user experience
- Made graphs with Grommet using data calculated or requested from third party API to display user statistics in an easily understood fashion
- Implemented Auth0 which allows users to login quickly with accounts previously created on commonly used services

Rare (JavaScript, HTML, CSS, front-end, NodeJS, Express, PostgreSQL database back-end)

[Live Site](#) | [Github](#)

A social journalism website

- Created secure user authentication using bcrypt password hashing to keep user information safe and provide user privacy
- Designed appealing, accessible UI with HTML and CSS that emphasized site's content to improve user interface
- Utilized third party Markdown editor for articles and comments to provide the end user with familiar yet also easy-to-implement text creation

Experience

Savers

Store Associate

Jan 2016 - Sept 2016

- Provided customer service by welcoming customers/donors and working the cash register
- Accepted, organized and prepared new donations for sale
- Tasked with regularly updating and maintaining store inventory to ensure latest products were always on display

Custom Built Cabinetry

Shop Assistant

Apr 2013 - Oct 2013

- Supported installation of cabinets in timely manner to guarantee client satisfaction
- Removed old or damaged supplies and kept shop area clean to ensure an efficient working environment
- Prepared client orders for installation by assisting in tasks such as sanding and transportation.
